The CAA figures are monthly, so will include passengers carried during the parts of Apr 2013 and Apr 2014 when KLM were **not** flying. The CAA figures do not distinguish between carriers, so will include passengers carried by non-KLM carriers. These two factors may both serve to over-estimate KLM's business. KLM averaged 44.4% (52,859/119040) of capacity when flying to/from Manston. Tops.
